

NORTH BRANFORD PUBLIC SCHOOLS
Essential Curriculum
Science

Kindergarten

The elementary science curriculum includes content in the area of Life Science (Trees) and Physical Science (Wood) and incorporates the skills and processes of science.

Upon the completion of Kindergarten, children will know and be able to:

- Observe, explore and investigate in order to obtain information.
- Develop an understanding of scientific inquiry.
- Identify, describe, and compare the properties of objects and materials.
- Understand characteristics and life cycles of organisms.
- Recognize changes in the environment.
- Recognize properties and changes of properties in matter.
- Develop appreciation of resources in the environment.
